Abstract

Choosing the best way for reporting the result of research is very important and has direct impact on the diffusion of research contribution. There are several ways like: publishing in the scientific journal, presenting in a conference, writing the book or book chapters, creating multimedia files, etc for introducing your results to other scholars. Among them publishing in a scientific journal is very important. There are some criteria which should be considered for selecting journal. They are journal reputation (Indexing and Abstracting, H-index, Impact factor, Rejection rate), Journal aim and scope, time and cost of journal review process, the reserch method, the significance of your results and the originality of journal website. Based on journal policies and review process, some important tips to increase your manuscript's chance of acceptance are discussed. Finally some usefull softwares and websites introduced.

Keywords: *journal selection, Indexed journal, journal ranking, Impact factor*
